

# SUMMER STUDENTS.

DESY International Summer Student Programme  
22 July to 11 September 2025

© DESY 2024

DESY is one of the world's leading research centres for photon science, particle and astroparticle physics as well as accelerator physics.

Each summer DESY invites up to 100 students in physics and related disciplines to join research groups and participate in their activities. The summer student programme consists of individual work projects and complementary lectures.

#### **Application deadline is 31 January 2025**

Qualified applicants should have completed three years of full-time studies at university level by summer 2025. All participants will receive financial support.

#### **Photon Science**

Projects are offered at DESY as well as EuXFEL and include research with synchrotrons, FELs, and optical lasers on molecules, soft matter, solid-state and nanomaterials, the development of new experimental techniques, the theory of light-matter interaction, and scientific computing.

#### **Elementary Particle, Astroparticle and Accelerator Physics**

Projects center around the analysis, software or detector related fields of experiments in elementary particle physics (ATLAS, CMS, BELLE II, ALPS II, and future experiments), astroparticle physics (CTA, IceCube, RNO-G, HESS), development of particle accelerators and detectors, theory, and scientific computing within the Worldwide LHC Computing Grid.
